

REAL LIFE ENERGY

Is a deflationary utility token based on real life utility bills.

- BURNING THE SUPPLY IN ORDER TO
RAISE THE PRICE!
+ BUY BACK MECHANISM.

Process:

- Monthly Top up

Example:

gas/electricity

Wi-fi, water etc

Show proof-of-purchase

[Paper Receipt, Online bills, Direct debits

EACH Top up results in a SPECIFIC
AMOUNT of supply to be BURNT per
MONTHLY calender.

Example:

\$15 electricity CASH payment = 0.15%

total supply BURN

\$15 gas CASH payment = 0.15% total supply BURN

Average BURN per WEEKLY utility purchase:

0.6% of total supply BURNT per WEEK

31.2% of total supply BURNT per YEAR

Same Example goes for
Other day to day utility bills

THE ONE DIFFERENCE:

A monthly brake down for the OTHER'S will be given as [online statements due to being ONLINE BASED ONLY]

- 7% developer payout for BUY BACK'S

- Minimum token life expectancy

[15 year's + dependent on future innovations]

A SMALL Minimum START UP fee OF 250 \$KOIN entry/funding is what is needed to make this a reality.
